

ABSTRACT OF THE DISCLOSURE

The present invention relates a vital matter promoting the growth, and increasing preservative capability of human body, animals and plants. The vital matter maximizes active rhythms of human body, animals and plants by inducing sympathy of energy and native wavelength between it and animals or plants.

In addition, the present invention relates a producing method of the vital matter composed of the following steps:
1) preparing a composition containing kaoline (white soil) 30-40wt%, potassium sulfate 15.0-20.0wt%, sodium sulfate 13.0-17.0wt%, feldspar 12.0-16.0wt%, talc 12.0-16.0% and ferric oxide 0.5-1.5wt%; and 2) mixing the above-mentioned compositin using a compressed molding method; and 3) heating the mixed composition at 1000-1300°C.

The vital matter of the present invention can be used in whole fields of industries, and will cause the original changes in in the field of industrial matters, and promote the welfare of human beings such as improvement of health and life of human.
